A stylized graphic featuring a large yellow sun partially obscured by a black silhouette of a city skyline. The sun is positioned in the upper left, with its lower half hidden behind the city. The city skyline is composed of several black rectangular shapes of varying heights. The background is a solid black rectangle. The title text is centered within the yellow area of the sun.

Rotarians on the Roof

“Rotarians on the Roof” Training and Service with SolarWork.org

Renewable energy is the key to reducing greenhouse gases that are the cause of climate change and global warming. Rooftop solar installations save building owners money on their monthly utility payments and reduce pollution in our local atmosphere.

As our Rotary Club does for Rebuilding Together Silicon Valley, we can start a new annual service project for climate change action by becoming trained and participating in rooftop solar installations for non-profit organization buildings in Los Gatos and the West Valley.

SunWork.org, a non-profit solar installer serving the San Francisco Bay Area, will first train our Rotary service volunteers in the basics of solar, electricity, and construction safety. Then, we will eventually work together with SunWork’s professional staff, installing racking, running conduit, hanging inverters, and mounting the solar panels on the rooftops of non-profit organization buildings, such as schools, churches, and charities.

---- YOU NEED NOT ACTUALLY GET UP ON A ROOF TO PARTICIPATE ----

The next Volunteer Solar Installer Training Webinar with SunWork.org will be held on Saturday, October 24, 2020.

SERVICE ABOVE SELF

**“So long as we love, we
serve; so long as we are
loved by others, I would
almost say that we are
indispensable; and no man
is useless while he has a
friend.”**
